

# DEVELOP QUICKLY. DEPLOY SWIFTLY. RUN SEAMLESSLY.

Today, it's hard to maintain continuous availability and even harder to recover if disaster strikes. To get back to business fast, you need a fully recoverable production environment that fits closely into a centrally managed business continuity plan. There's one solution that offers a distinctive, reliable and effective single recovery and business continuity approach. It's from Sungard Availability Services (Sungard AS).

By working with a market leader who knows how to ensure cloud capabilities are stable, resilient and built for continuity and recovery, you can expect to:

- **Manage your complex cloud environment** to reduce overall spend, maximize utilization and leverage enterprise-level support
- **Build resiliency** across cloud-based production and recovery systems
- **Leverage the latest advances** in cloud to adapt your hybrid IT environment to changing needs and deliver business outcomes

Sungard AS Cloud and Hosting Solutions include:

## CLOUD SERVICES

Our cloud solutions come with virtualized security, increased automation and workload mobility. Choose from a range of cloud services. Manage the environment on your own or choose a fully-managed infrastructure. We also have cloud-based infrastructures that are pre-qualified by our partners and optimized to run their specific applications.

**CLOUD SERVICES | SELF-MANAGED CLOUD.** Self-Managed Cloud gives your business and IT staff the agility and extensibility of a public cloud solution to develop, test, and run applications while providing collaborative and control capabilities that offer transparency around IT spend.

**CLOUD SERVICES | MANAGED.** Built on a fully PCI-DSS-compliant infrastructure and designed for minimized downtime, multi-tenant Managed Cloud from Sungard AS features innovative, class-leading technology that makes it more reliable than average cloud infrastructures used to house production applications.

**CLOUD SERVICES | HOSTED PRIVATE.** Provides the scalability and agility of a cloud infrastructure with the security and performance advantages of having server and storage resources fully dedicated to your organization. Managed and self-managed private cloud options are available.

**CLOUD SERVICES | GOVERNMENT AND COMMUNITY CLOUD.** Pre-certified cloud-based infrastructures optimized to run specific applications including Oracle E-Business Solutions (EBS), SAP and SAP HANA that reduce deployment time.

### **HOSTING SERVICES**

From colocation services to managed cloud hosting, Sungard AS provides access to industry-leading services, application experience and enterprise-class service level agreements.

### **MANAGED SECURITY SERVICES**

This spans all security layers, from intrusion detection, firewall, identity and access management, authentication, DDoS prevention, file integrity monitoring, WAF, VPN, and vulnerability assessments. We can help you apply a defense-in-depth security strategy that deploys multiple layers of protection throughout the network.

### **WHY SUNGARD AS?**

With more than 30 years of experience helping customers meet their availability goals, we can help you leverage our cloud and hosting services to create the highly resilient and responsive environment you need. As a result, you can move forward with less complexity and more speed as you race to deliver the innovative applications that will differentiate you in the future.

Let us assess your business requirements and create a tailored path to our cloud and hosting services today.
