

Scottsdale, AZ

Sungard Availability Services is a leading provider of critical production and recovery services to global enterprise customers. Sungard AS partners with customers to understand their business needs and provide IT solutions tailored to help them achieve their desired business outcomes. Leveraging more than 30 years of experience and a global network of facilities worldwide, Sungard AS supports a wide range of data center and IT infrastructure, cloud and applications services that help customers manage complex IT, adapt quickly and build resiliency and availability by keeping mission-critical information and applications up and running.

Services provided:

- **Colocation:** Provides fully redundant, high-performance data center facilities across the world — supported by highly experienced and responsive IT operations personnel. Colocation services range from high-quality conditioned space, power, and network access to managed colocation including monitoring, security, and data backup services. We tailor these solutions to your needs and scale them as your business grows.
- **Managed IT Services:** A comprehensive portfolio of fully managed, adaptable and cost effective application hosting services leverage our enterprise-class infrastructure, IT availability capabilities, and application expertise. Our managed IT services include application management, managed servers, managed security, storage and data protection, and network services deployed in both dedicated and cloud-based models.
- **Recovery Services:** Industry leading traditional, advanced, cloud-based, and fully managed recovery options support your application and business process availability requirements. We tailor your solution to meet your needs, manage your application and data recovery services, as well as perform regular recovery testing.
- **Work Area Recovery:** To get your people working again after an outage or disaster, our global network of center-based and mobile facilities support your shared or dedicated end-user recovery requirements and provide the expert personnel, advanced technologies, and responsiveness you need.
