

Application Cloud Services | SAP

Scale your SAP environment to grow at the speed of your business

A secure and reliable platform specifically designed and certified to run SAP and SAP HANA applications.

Sungard AS services for SAP are designed to meet your immediate needs while being easily adaptable to evolving business requirements.

Around the world, the best-run businesses rely on SAP enterprise software to compete and succeed. But building and maintaining an SAP application environment can require significant investments in time and resources. This is further complicated by the rapid advancements in SAP HANA application features, the underlying infrastructure technologies and the associated best practices that need to be taken into consideration when planning and implementing SAP today.

THIS MEANS THAT CHOOSING THE RIGHT HOSTING APPROACH FOR SAP IS MORE CRITICAL NOW THAN EVER.

The solution is Application Cloud Services | SAP from Sungard Availability Services (Sungard AS). Sungard AS provides a secure, reliable, and scalable platform for your SAP and SAP HANA applications. Our virtualized platform provides all the necessary compute, storage, network and backup you need to support both production and non-production workloads. You avoid the risk of purchasing and managing infrastructure assets for rapidly evolving SAP HANA technologies (current or planned), while achieving the highest levels of SAP application availability and performance.

Whether you need a single development environment or a complete multi-landscape infrastructure, Sungard AS delivers the SAP platform services that you need — quickly, expertly and at a predictable price. What's more, Application Cloud Services | SAP can interconnect with other Sungard AS hosted environments for a flexible hybrid IT solution.

Building on Sungard AS' extensive experience in designing and operating highly available infrastructures, our SAP Cloud and SAP HANA Services provide a high performance platform with multiple layers of application protection, while being adaptable enough to grow with the specific needs of your business as it achieves new levels of success.

KEY FEATURES

- Highly configurable, Application Cloud Services | SAP provides virtualized SAP and SAP HANA Infrastructure as a Service • 24/7 infrastructure monitoring and management • 99.95% SAP Infrastructure availability service-level agreements (SLAs) • Integrated data protection with online backup and restore • Secondary site protection with low environment recovery SAP times • Optional SAP Basis management services

THE SUNGARD AS ADVANTAGE

EXPERIENCE • Expertise in management and recovery of complex IT environments • Optimized SAP and SAP HANA application infrastructure for greater ROI and more productive users • SAP application specialists who provide expertise on SAP application administration, database administration and performance management • More than sixteen years of experience managing SAP production environments combined with more than 35 years of experience in providing business and application availability services

RELIABILITY • High availability SLAs for production SAP and SAP HANA systems • Managed SAP Basis Option with a production system availability SLA • Rigorous backups, rapid restoration, and minimized risk of data loss • Virtualized platform built with both local-instance failover and optional secondary-site recoverability

SECURITY • Data center facilities operated at high standards for physical security • Virtualized SAP and SAP HANA systems logically isolated and firewalled • Connection options that include site-to-site virtual private networks and private carrier circuits

EXCELLENCE • SAP-certified cloud services provider • SAP-certified on HANA Operations • Data centers and processes included in SSAE 16 Type II audits, backed by ITILv3, and certified to the ISO/IEC 20000-1 standard

SAP® Certified
in Cloud Services

SAP® Certified
in SAP HANA® Operations Services

BUSINESS BENEFITS

SAP PRODUCTION-READY

SAP platforms that are flexible and can grow with your business and provide optional SAP Basis services with guaranteed production application availability levels.

APPLICATION RESILIENCY

Multiple layers of infrastructure and production application protection with both local site failover and optional secondary site failover.

SIMPLIFIED MANAGEMENT, PEAK PERFORMANCE

Sungard AS takes care of the underlying systems infrastructure and administration, so your SAP landscape performs at its best.

AVAILABILITY AND FLEXIBILITY BEYOND SAP

We can interconnect and support highly complex hybrid infrastructures so that more of your IT needs can be satisfied by a single service provider —while delivering integrated operations processes and SLAs.
