

BACKUP ASSESSMENT

Towards successful backup strategies

Improving the way you plan, and manage the way you backup your business critical data can significantly improve your ability to recover from a business interruption, and better manage the cost and overhead of your data management.

Sungard Availability Services' Backup Assessment service analyses your data volumes and their criticality to your business, allowing you to define the appropriate backup strategy for optimum recovery.

What does it involve?

- A Sungard AS Consultant will contact you to arrange a site visit
- Relevant systems and backup information will be requested prior to the site visit to ensure efficient use of time
- A site visit will be held to discuss:
 - overall backup strategy
 - applications, systems and data
 - systems backup policy
 - completion of a Vaulting Solutions questionnaire.

The Benefits

The assessment gives you:

- Access to our expert storage consultants with many years experience in solving customer problems
- A 'big picture' analysis of actual data, systems, volumes and usage patterns
- An assessment of current backup policy and its alignment with business recovery requirements
- A detailed report, providing information on existing backup strategy and recommendations for failings and alternatives
- Recommendations for an efficient vaulting solution and best practice tailored to your exact requirements
- A Sungard AS's Vaulting Solutions quote based on actual needs.
