

DEVELOP QUICKLY. DEPLOY SWIFTLY. RUN SEAMLESSLY.

Today, it's hard to maintain continuous availability and even harder to recover if disaster strikes. To get back to business fast, you need a fully recoverable production environment that fits closely into a centrally managed business continuity plan. There's one solution that offers a distinctive, reliable and effective single recovery and business continuity approach. It's from Sungard Availability Services (Sungard AS).

By working with a market leader who knows how to ensure cloud capabilities are stable, resilient and built for continuity and recovery, you can expect to:

- **Manage your complex cloud environment** to reduce overall spend, maximize utilization and leverage enterprise-level support
- **Build resiliency** across cloud-based production and recovery systems
- **Leverage the latest advances** in cloud to adapt your hybrid IT environment to changing needs and deliver business outcomes

Sungard AS Cloud and Hosting Solutions include:

CLOUD SERVICES

Our cloud solutions come with virtualized security and increased automation. Choose from a range of cloud services. Manage the environment on your own or choose a fully-managed infrastructure. We also have cloud-based infrastructures that are pre-qualified by our partners and optimized to run their specific applications.

MANAGED CLOUD | AWS. Managed AWS from Sungard Availability Services (Sungard AS) enables the flexibility, scalability and reliability of the industry-leading AWS cloud within your hybrid IT environment without sacrificing the control, compliance and security your business requires.

MANAGED CLOUD | HOSTED PRIVATE CLOUD (HPC). Provides the scalability and agility of cloud infrastructure with the security and performance advantages of having server and storage resources fully dedicated to your organization. Use private clouds when you need to protect your most sensitive data, or when you have specific application performance goals.

CLOUD SERVICES | GOVERNMENT CLOUD. The Sungard AS government cloud is available in the UK and provides the managed infrastructure needed to support digitization mandates for how OFFICIAL or SENSITIVE applications and data can be processed and stored. As well as servicing compliance requirements. Further, the cloud supports cost-saving initiatives for government agencies under pressure to use third-party infrastructure services to avoid data center construction and management costs.

HOSTING SERVICES

From colocation services to managed cloud hosting, Sungard AS provides access to industry-leading services, application experience and enterprise-class service level agreements.

MANAGED SECURITY SERVICES

This spans all security layers, from intrusion detection, firewall, identity and access management, authentication, DDoS prevention, file integrity monitoring, WAF, VPN, and vulnerability assessments. We can help you apply a defense-in-depth security strategy that deploys multiple layers of protection throughout the network.

SUNGARD AS CONSULTING. Our consulting teams will work alongside your team to address the critical challenges you face, regardless of your organization's size or industry. Our expertise and approach is further supported with a Sungard AS suite of flexibility managed services and recovery solutions suited for complex, hybrid environments that are constantly coping with change. Our core strengths include:

- Managing complexity
- Reducing Risk
- Protecting and evolving IT strategy and operations

Our Sungard AS consultants see themselves as your partner. It is our mission to help you improve the availability, security, recoverability, and performance of your business, all while staying compliant with regulatory mandates.

WHY SUNGARD AS?

With more than 35 years of experience helping customers meet their availability goals, we can help you leverage our cloud and hosting services to create the highly resilient and responsive environment you need. As a result, you can move forward with less complexity and more speed as you race to deliver the innovative applications that will differentiate you in the future.

Let us assess your business requirements and create a tailored path to our cloud and hosting services today.
