

The next step in application availability: Cloud and virtualization capabilities.

Guaranteed recovery.

SUNGARD®
**AVAILABILITY
SERVICES™**

Recover2Cloud® from Sungard Availability Services

Faster, more flexible and more efficient

Organizations need disaster recovery, but can't always afford the setup and maintenance of a standby recovery site. Even leveraging shared, physical infrastructure components, which can deliver 30–60% cost savings when obtained from Sungard AS, can't match the efficiency of shared cloud infrastructure. New secure cloud technology has mitigated long-standing security concerns, and has enabled viable applications recovery using a shared enterprise cloud environment.

Recover2Cloud Advantages

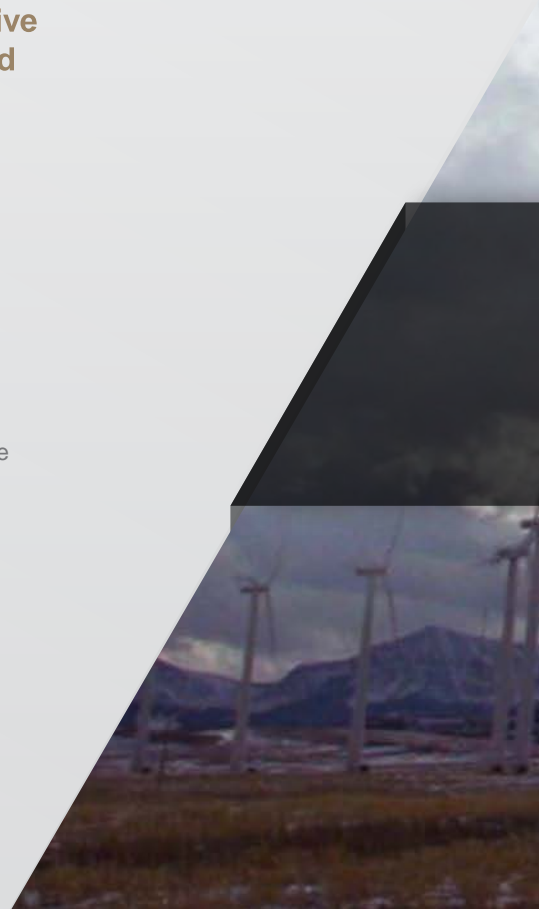

- Fully-managed recovery process
- Guaranteed service levels
- Patented testing without impacting production
- Seamless interconnects between Sungard AS' cloud and other IT infrastructure in Sungard AS
- Enterprise-class cloud infrastructure
 - Elastic on-demand scalability of networks, storage and compute capacity
 - Subscription-based OpEx model
 - Dedicated, shared, or hybrid infrastructure
- Advanced data protection
- Multiple availability options, enabling a tiered recovery strategy based on the business value of specific applications and data

Sungard AS Recover2Cloud (R2C) services provide fully-managed recovery of applications and data on a secure, enterprise-class cloud platform. These cloud-based services help reduce business risk and lower administrative and recovery costs. In addition, they deliver fully-managed testing and recovery, incorporating Sungard AS' process expertise in a suite of simple, turn-key solutions.

Flexible cloud platform implementations

You need flexibility in your cloud implementation for recovery. Why? Because not all applications are mission-critical to your business. For higher-value applications with mission-critical data, you need secure private cloud options — which cost more. For lower-tier, back-office applications, you need lower-cost options — obtainable with shared cloud implementations. Recover2Cloud services provide the flexibility to choose.

In addition, the Recovery-as-a-Service (RaaS) offerings are customized availability solutions spanning multiple systems with different uptime requirements. Sungard AS' infrastructure resources and process expertise enable our experts to combine cloud with virtual infrastructure and dedicated physical equipment and deliver comprehensive, effective solutions tailored to your organization's individual needs and map to your unique production environments.

**The next step in application availability:
Cloud and virtualization capabilities.**

Guaranteed recovery.

**Enterprise-Class Cloud Built
on Best-of-Breed Technology**

The Sungard AS Recover2Cloud platform leverages best-in-class technology from partners including Actifio®, EMC®, Cisco®, NetApp®, and VMWare® to deliver high availability and security.

Sungard AS combines the cloud platform with fully-managed recovery services, backed by contractually guaranteed service level agreements.

Recover2Cloud®

Adding modern data protection to cloud for better recovery results

Sungard AS offers Recover2Cloud solutions packaged with server replication, storage replication and vaulting protection — so you can select the availability level that matches the value of individual applications to your business.

Select from these Recover2Cloud solution offerings:

- Recover2Cloud for Server Replication** — packaged with asynchronous server-based replication and managed end-to-end to deliver recovery of Windows, Linux, UNIX, AIX and IBM i applications at sub-4 hour recovery times; built-in Continuous Data Protection enables restoration to any point in time within a three-day timeframe prior to the outage
- Recover2Cloud for vCenter SRM** — provides SLA-backed automated recovery of applications on VMware infrastructures at secure Sungard AS cloud-based recovery sites. The service helps deliver fast, assured application protection and recovery, eliminating recovery challenges from customers at the time of test or disaster while also reducing recovery times from days to just hours.
- Recover2Cloud for Actifio** — copy data virtualization lets you capture application data, manage it efficiently, and use it when and where you need by eliminating point tools and vendor lock-in to create true business continuity.
- Recover2Cloud for Vaulting** — packaged with online backup and recovery services, managed end-to-end to enable assured restore of data from your online vault together with applications recovery at sub-24 hour recovery times.

Flexible cloud recovery solutions to meet the unique needs of your business.

Technology options	Recovery Point (RPO) bandwidth dependent	Recovery Time (RTO)
Server Replication	TYPICALLY 5 TO 15 MINUTES	< 4 HOURS FOR MOST SMALL ENVIRONMENTS (50 SERVERS) < 6 HOURS FOR 100 SERVERS
vCenter SRM	TYPICALLY 15 TO 30 MINUTES	< 4 HOURS FOR MOST MEDIUM ENVIRONMENTS (250 SERVERS)
Actifio	BASED ON LAST SUCCESSFUL SNAPSHOT	< 4 HOURS FOR MOST MEDIUM
Vaulting	AT TIME OF LAST SUCCESSFUL BACKUP — AVOIDING THE NEED TO WAIT FOR TAPE ROTATION	SUB-24 HOURS USING DISK-BASED RESTORE SPEED

In addition to our Recover2Cloud solutions, Sungard AS Recovery Services provides a comprehensive and affordable suite of recovery services that cover your needs for complex data and application protection and recovery for

everything from mainframes to virtual machines. Our solutions bridge the gap between legacy and cloud-based recovery, providing a single program for all your recovery requirements.

Sungard AS Recovery Services offers a full complement of solutions that can be customized to your unique requirements

- **Managed Recovery Program:** ensures comprehensive, compliant and effective testing and recovery
- **Data Management:** delivers data and application availability to help you manage your data more efficiently, effectively and securely.
- **Workforce Continuity:** provides your employees with the workspace, technology and resources they need to get back to work after a disaster
- **Managed Recovery Services and Testing:** allows the ability to perform and document recovery tests and provides critical support at the time of disaster

Why choose Sungard AS?

More than 30 years of leadership supporting complex IT operations and providing availability management.

Highly flexible tailored solutions to support customers' unique business and IT requirements.

Managed services ranging from hosting to virtualization to cloud, in a resilient, secure, enterprise-grade IT environment.

Breadth of services and expertise to transform and operate business-critical hybrid IT environments.
