

PROTECT YOUR DATA. RECOVER YOUR ENVIRONMENT. MANAGE YOUR RECOVERY.

Today, it's hard to maintain continuous availability and even harder to recover if disaster strikes. To get back to business fast, you need a fully recoverable production environment that fits closely into a centrally managed business continuity plan. There's one solution that offers a distinctive, reliable and effective single recovery and business continuity approach. It's from Sungard Availability Services (Sungard AS).

Our Recovery and Business Continuity Services combine the speed, scalability and cost efficiency of the cloud with our infrastructure and application management expertise. As a result, you can rest assured that your enterprise will be able to cope with a crisis. You'll be in a better position to:

- **Build resiliency** into your infrastructure and business operations
- **Protect your data** and tier recovery to mission-criticality
- **Identify and respond to threats** in minutes instead of days

And you'll be able to rely on a best-in-breed solution that protects your enterprise, now and in the future. With Sungard AS, you won't be preparing to recover. You'll prepare to be resilient with these services:

CLOUD-BASED RECOVERY

A fully-managed recovery solution for your IT environments on a secure, enterprise-class cloud platform via Sungard AS cloud or our partners.

CLOUD-BASED RECOVERY | AWS. Full recovery capabilities of Sungard AS – including Operating System recovery, storage replication, off-site storage and automated recovery of protected workloads – offered as a fully managed, utility-priced service on Amazon Web Services.

CLOUD-BASED RECOVERY | VAULTING. Managed end-to-end, enabling data restoration from an online vault in under 24 hours, with RPO being the time of the last successful backup.

CLOUD-BASED RECOVERY | SERVER REPLICATION. For critical applications that need higher levels of availability. Full application environments are recovered in less than four hours – guaranteed, with data and applications restored to a near-zero recovery point.

SYSTEMS AND DATA RECOVERY SERVICE

By leveraging best practices and purpose-built technologies for data and system recovery, you can rely on Sungard AS to fulfill business SLAs for complex, hybrid IT environments.

SYSTEMS AND DATA RECOVERY SERVICES | DATA REPLICATION. For mission-critical data, we offer replication services that deliver a fully working copy of your environment in a ready-to-use state, should disaster happen.

SYSTEMS AND DATA RECOVERY SERVICES | BACKUP AND VAULTING. This can be ideal for non-mission-critical data with less urgent recovery requirements, for data with RTO and RPO goals between 24-48 hours, and for long-term data retention.

SYSTEMS AND DATA RECOVERY SERVICES | MANAGED RECOVERY PROGRAM. Sungard AS can assume full responsibility for your IT recovery, tailoring a program to your specific RTO and RPO needs, developing a strategy, defining and managing the program and testing, and providing ongoing change management.

SYSTEMS AND DATA RECOVERY SERVICES | PHYSICAL IT RECOVERY. Place your systems at a Sungard AS recovery facility and receive access to recovery, redundancy and connectivity expertise and the benefits of experience across a broad range of server environments.

BUSINESS CONTINUITY SERVICES

In the face of disaster, true business success relies on more than recovery. It relies on a comprehensive view of business continuity. We can help with our Assurance Business Continuity Software. It delivers:

- Automated business continuity processes in a single tool
- Real-time alerts for insight into potential threats--from data theft to natural disasters
- A real-time, intuitive dashboard view into key performance indicators that let you identify, manage and address on-going challenges.
- Automated business continuity processes in a single tool
- Real-time alerts for insight into potential threats--from data theft to natural disasters
- A real-time, intuitive dashboard view into key performance indicators that let you identify, manage and address on-going challenges.

WHY SUNGARD AS?

Sungard AS is a leader in disaster recovery with more than 30 years of experience in providing availability services across multiple platforms. We have a proven track record of managing mission-critical production and recovery environments for our customers and a team of consultants with the expertise you need to design and deliver a continuity and recovery solution to meet your objectives.

You can rely on us for the fully recoverable production environment you need to recover your systems and your business operations. Let's move forward with a solution for your organization today.
