Through Sungard Availability Services' Partner Program, you have access to a complete set of availability services that help companies of all types and sizes manage operational risk and maintain flexible, resilient IT environments. The Partner Program is designed to help you successfully add cloud and "as-a-service" solutions to your portfolio and keep pace with evolving customer demands.

- ▼ Increase your information availability expertise and differentiate your business from the competition
- ▼ Increase productivity and reduce the cost of sale with targeted marketing and sales resources
