

The IT Wish List:

The top areas U.S. IT leaders want to improve the most

Overall, these areas won top spots among industries surveyed across the U.S.

Technology Infrastructure

Network Security

Cloud Computing

Network Security investments were the top rated category when U.S.-based IT executives were asked “If you could improve just three things in your organization, what would they be?”

Fully 50% of Energy, Oil/Gas & Utility companies indicated **Network Security** was their number one “wish list” item, well ahead of other categories.

In healthcare, the clear winner for improvements was **Business Intelligence & Analytics** improvements. Interestingly, Network Security did not make the list in Financial Services companies, where **IT infrastructure** improvements were ranked first.

Within each industry, what were the top three improvement areas identified?

ENERGY, OIL/GAS & UTILITIES

1. Network Security
2. Mobility
3. IT Infrastructure

TRANSPORT & LOGISTICS

1. Network Security
2. IT Infrastructure
3. Reduce Legacy IT
