A robust and secure internet solution to meet the most demanding business requirements

Sungard AS Managed Internet Access comes with a highly reliable 99.99% availability service-level agreement (SLA)
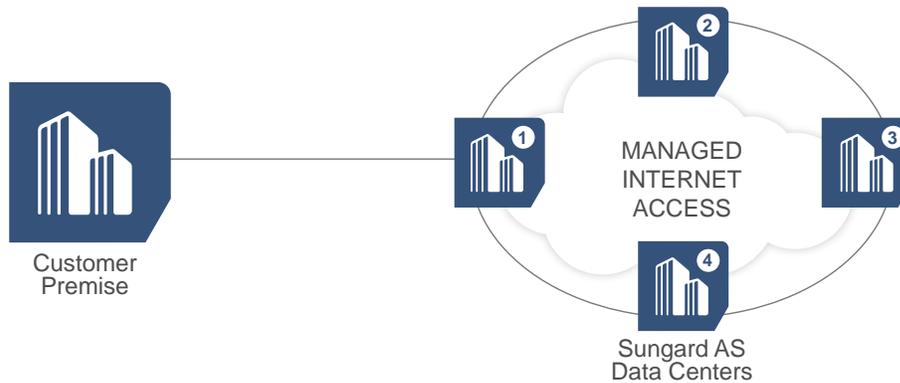

Key benefits

- **Unmatched reliability—**Highly reliable environment allowing "always on access" to your customers, employees, and partners increasing productivity and growth
- **Support for core operations—** Leverage a high-speed, highly reliable connection to empower employees and support transactions that drive revenue.
- **Trusted access—**Benefit from Sungard AS' unequalled data centers, plus our recognized commitment to service delivery.
- **Protection** from malicious attacks that cost your company time, money and reputational damage.

Key capabilities

- Reliable network connection through our multiprotocol label-switching (MPLS) backbone network
- A dedicated team of certified experts to handle all monitoring and issue resolution
- Easy scalability to additional Sungard AS services
- Auto detection and mitigation of DDoS attacks

You rely on the Internet for more than just email and websites. With IT resources in the cloud and employees spread across the globe, connectivity has become a core business requirement.

In today's business environment you need a reliable Internet connection that prevents latency for uploads and downloads and provides you with the bandwidth needed to conduct rapid data transfers and instantaneous ecommerce transactions.

You need Sungard AS Managed Internet Access.

Sungard AS Managed Internet Access delivers high-performance, highly available Internet service to connect you to business-critical applications and services hosted by multiple data centers and service providers. Connectivity to these hosted services needs to meet the most demanding requirements for speed and reliability today — and the capacity to address the IT and business imperatives of tomorrow.

Sungard AS Managed Internet Access comes with a highly reliable 99.99% availability service-level agreement (SLA). Built-in redundancy ensures that your data always has an open and available path to travel. In case of a connection issue, traffic is immediately re-routed to another ISP, so your business always remains fast and connected.

Distributed Denial of Service (DDoS) detection and mitigation services are a standard component of Sungard AS Managed Internet Access. Our DDoS infrastructure protects all traffic traversing the Sungard AS network against possible attacks. Known signatures and behavioral analysis automatically uncover and mitigate known threats. For extenuating circumstances in which standard DDoS may not be sufficient, Sungard AS offers Emergency DDoS Services as needed.

With Sungard AS Managed Internet Access, you have the connectivity, reliability, and performance to sustain your core operations. Combined with additional network, hosting, cloud and application services from Sungard AS Availability Services, your organization is empowered with always-on IT resources. Ensuring continuous, high-speed Internet connectivity to empower your business success.
