## IT IS CONSTANTLY EVOLVING

As IT systems and workloads get more complex, the underlying architecture and operating system must be able to respond to the rapid pace of change in business and technology innovation. Performance is key, Sungard Availability Services (Sungard AS) can help you achieve the performance you need, and build for the future with a Private Cloud solution powered by best-in-class hyper-converged technology from Dell Technologies and VMware.

The Sungard AS Private Cloud solution is built to scale with you at the pace you need to grow, with flexible minimum commitments and on-demand scalability. From self-managed to fully managed, and from multi-tenant to fully dedicated we can build a solution that best meets your business objectives. By combining Sungard AS' world-class expertise in resiliency and availability with industry leading cloud technology we deliver a tailored solution in our interconnected data centers that will help businesses navigate their digital journeys today and on into tomorrow.

**Help when you need it, as you need it.** Choose from self-managed, fully managed, or something in between.

**Greatest commercial flexibility to optimize your spend.**

Subscribe to a minimum solution commit and then shift your spend as needed. Pay-as-you-use on-demand bursting /growth and add/change services all without contract amendments.

**Easy recovery and resilience.** We recover applications within minutes, all the way up the stack. From fully redundant High Availability (HA), all the way through backup and recovery services.

**We give you control and visibility.** Effortlessly monitor and manage your entire Private Cloud environment with our easy to use cloud portal.

**Built for today and future proofed for tomorrow.** We bring direct access to our breadth of production, recovery, workplace and network solutions, streamlining your hybrid IT environments.

## WE MAKE COMPLICATED SIMPLE

### WHY SUNGARD AS?

We know the success of your business isn't just about one application, one workload or one environment. It's the ability for all your applications and workloads to reliably work together within or across multiple environments and to always be available. That's what keeps your business moving forward, and helping you get wherever you want to go.

By partnering with a recognized leader with a forty-year track record providing customers with highly available hybrid solutions including colocation, fully managed production and recovery and backup, you gain immediate access to all the services that power your business. Purpose-built for resilience and performance, backed by the network access your applications demand, our solutions simplify your otherwise complicated hybrid landscape. This allows you to focus on your core business.

**Cloud users are not doing all they can to optimize costs**

*It is estimated they waste **30% of their cloud spend**.* We can help minimize this waste with our new flexible contracting, consumption, and managed services models.
