

Accelerate your security posture...

And protect your business from malicious traffic with an Intrusion Prevention Service (IPS) from Sungard Availability Services

Navigating the complexity of cyber security

Security concerns continue to be a challenge for enterprises, respondents indicated:

\$1.07M

Cost difference where remote workers were a factor in causing the breach*

80%

Cost difference where security AI and automation was fully deployed vs. not deployed*

\$4.24M

Average cost of a data breach, rising from \$3.86M in 2020.

As cyberattacks evolve, network security requires attention to cover all threats for comprehensive protection. The ever increasing demand of cyber threats calls for renewed focus on IPS from organizations looking to provide a deeper level of security and visibility.

Sungard Availability Services Intrusion Prevention Service (IPS) forms part of our managed security portfolio and provides in line blocking of malicious traffic. It provides an added layer of security beyond what a standard firewall alone can provide.

Intrusion Prevention Services benefits

- ▲ Up to 19gbps throughput
- ▲ 15-minute time to notify SLA
- ▲ IPS (Threat protection) GEO blocking
- ▲ 24x7 SOC - managed by Sungard AS security team
- ▲ 90-day log retention
- ▲ IPS security event reporting
- ▲ 99.95% hardware availability SLA
- ▲ Monitor and report on IPS availability

Cyber security is a continuous challenge.

Organizations face resource constraints such as, time and personnel when it comes to cyber security.

No matter your size, we have you covered.

Regardless of the size of your business we have Cisco Firepower units to suit your throughput needs.

Don't be buried in alerts.

One of the most common challenges organizations face is being 'buried in alerts'. Sungard AS' IPS drops and blocks malicious traffic in real time, sparing you from unnecessary alert overload.

Why Sungard AS?

We are outcome obsessed — so you get what you need, WHEN you need it!

We keep your business running all day, every day. We understand IT is a constant evolution that requires availability and resilience for complex hybrid environments. Our experts work with you to understand your business objectives, and then build a personalized plan to deliver the outcomes you need. We enable highly available, scalable, resilient and secure hybrid IT solutions to ensure you are always on.

Need help migrating or transforming your cloud environment?

Sungard AS can help with that too! We have a myriad of intuitive cloud offerings and know how to design a migration path to align your existing workloads to our environments ensure you are always on.

287

Average number of days to identify and contain a data breach

\$4.62M

average total cost of a ransomware breach
